

ShockMaster 500

RSWT- Radial Shockwave Therapy device

The new standard in radial shockwave therapy.

For radial shockwave therapy. Pneumatically generated, acoustic pulses (shockwaves) are introduced into the body over a large area by means of a freely movable hand piece and cover the entire pain region.

Characteristics

- 2 output channels
- Integrated body parts screen
- Visual patient evaluation via VAS score
- Treatment guide inside
- An attractive full color 7" touch screen display
- Just a few clicks away to start and treat

Optional accessories

- 306.900 ShockMaster 15mm applicator
- 306.372 ShockMaster 6mm acup. Applicator
- 338.074 ShockMaster D-ACTOR® 20 S applicator
- 338.085 ShockMaster D-ACTOR® 35 S applicator
- 326.447 ShockMaster RSWT focus lens set
- 333.212 ShockMaster Deep Impact applicator
- 311.388 ShockMaster 15mm applicator MA-X
- 322.451 Protection cap applicator - 50 pcs
- 333.201 ShockMaster V-ACTOR hand piece
- 333.223 ShockMaster V-ACTOR 25mm applicator set
- 333.234 ShockMaster V-ACTOR 40mm applicator set
- 327.734 F-Meter (pain measurement)
- 309.771 Revision kit Metal
- 311.366 Revision kit MA-X

Technical specifications

Screen	Full color 7" touch screen
Dimensions Device	h16 x w36 x d39 cm
Trolley	h88 x w36 x d44 cm
Weight Device	8 kg
Trolley	40 kg
Hand piece Weight	445 gr
Selectable shock frequency	1 to 21 Hz
	1 to 35 Hz with V-ACTOR®
Shock release	trigger button on hand piece
Energy level:	1- 5 bar
Energy flux density on shock transmitter:	0,01-0,38 mJ/mm (18,5 MPa)
Shock wave generation	ballistic

Standard accessories

- 311.388 ShockMaster 15mm applicator MA-X
- 313.929 ShockMaster RSW hand piece
- 100.016 Contact-gel GymnaUniphy - 500 ml
